EDUCATION

Vellore Institute Of Technology

Bachelor of Technology in Computer Science and Engineering

Aug. 2022 – Apr 2026

Current CGPA: 7.88

EXPERIENCE

Software Developer Intern

October 2024 – December 2024

Arrise Solutions India Pvt. Ltd.

Noida, UP

- Built and shipped 10+ production-ready backend features using Spring Boot including RESTful APIs, JWT-based authentication, and RBAC, reducing authentication-related bug reports by 30%.
- Collaborated with a global cross-functional team on the Romania-based project, writing 10+ structured test cases and validating 2 major feature releases to meet international delivery standards.
- Gained hands-on experience across 3 full sprint cycles — from planning and standups to code reviews, QA, and production deployments — consistently delivering all assigned tasks within deadlines.
- Developed 5+ dynamic, responsive frontend interfaces using React.js, HTML, CSS, and JavaScript, collaborating with UI/UX designers to deliver pixel-accurate, cross-browser compatible components.

PROJECTS

Empowerly | Spring Boot, MongoDB, Docker | Live Link: Empowerly

January 2025 – February 2025

- Engineered a full-stack HR platform using Spring Boot and React.js, covering 15+ core modules — attendance tracking, leave management, payroll automation, performance reviews, and real-time employee collaboration.
- Built real-time one-on-one chat using Spring WebSocket and peer-to-peer video meetings using WebRTC, enabling live employee communication with unread indicators, message management, and meeting scheduling.
- Integrated Groq AI for an HR chatbot answering policy queries 24/7, personalized skill development recommendations, and automated performance insights generation with strengths/gap analysis.
- Designed a 6-layer security architecture with BCrypt password hashing, stateless JWT, RBAC, active session monitoring with auto-logout, and unusual-activity detection with real-time security alerts.

ArriBot | Java, SpringBoot, REST APIs, MongoDB | Live Link: ArriBot

October 2024 – December 2024

- Built during internship at Arrise Solutions — a full-stack AI learning platform integrating 6 modules: Neural Chat, flashcard generation, quiz engine, summarizer, resume analyzer, and learning path generator.
- Implemented two-layer AI governance with per-minute rate limiting, daily usage caps per feature, and real-time token consumption tracking on a live dashboard.
- Built Learning Path Generator using Groq producing multi-week JSON curricula with daily milestones (FLASHCARD/QUIZ/SUMMARY), persisted in MongoDB with real-time completion tracking.

ASTraMind | FastAPI, Python, REST APIs, MongoDB | Live Link: ASTraMind

November 2025 – December 2025

- Built a full-stack AI code intelligence platform indexing any GitHub repository into a queryable vector knowledge base using AST parsing, sentence-transformers, and ChromaDB — enabling natural language queries in a minute.
- Architected a production-grade RAG pipeline with language-aware chunking by logical functions and classes rather than fixed token windows, significantly improving retrieval precision and reducing LLM hallucinations.
- Designed 15 specialized AI agents using Groq covering security auditing, code review, debug analysis, architecture mapping, test generation, ADR generation, and codebase onboarding by developer role.
- Built a vector similarity search + prompt assembly pipeline: retrieved top-k relevant code chunks, injected as grounded context into LLM prompts, and streamed cited responses as Markdown with syntax highlighting.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript, Kotlin, C++

AI & Machine Learning: LLMs, Generative AI, Prompt Engineering, RAG, AI Agents, NLP Fundamentals, Model Integration, Vector Embeddings

Backend, Cloud & Tools: Spring Boot, FastAPI, Django, Node.js, RESTful APIs, Microservices, JWT, WebSocket, WebRTC, AWS, Docker, Git, GitHub Actions, Jenkins, CI/CD, Render, Vercel, Postman, Swagger

Databases: MySQL, PostgreSQL, MongoDB

Core Competencies: Data Structure and Algorithms (DSA), Object-Oriented Programming (OOP), Operating System, Computer Networks, API Design, Scalability, Performance Optimization, SDLC, Clean Code, Test Automation

Certifications: NPTEL Cloud Computing – IIT Madras | Oracle OCI DevOps Professional
