Education

Vellore Institute of Technology

2022–2026

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Bhopal, Madhya Pradesh

Technical Skills

Languages: Java, Python, SQL, JavaScript.

Cloud & Systems: AWS, Docker, Git, GitHub Actions, Jenkins, CI/CD, Render, Vercel, Postman.

Backend & APIs: Spring Boot, Node.js, FastAPI, RESTful APIs, Microservices, JWT, WebSocket, WebRTC, J2EE, Swagger.

Databases: MySQL, PostgreSQL, MongoDB.

Core CS: Data Structures and Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, test automation.

Concepts: API Design, Scalability, Performance Optimization, SDLC, Agile Methodology, Clean Code Practices.

Certifications: NPTEL Cloud Computing - IIT Madras, Oracle OCI DevOps Professional.

Experience

Arrise Solutions India Pvt. Ltd.

October 2024 – December 2024

Full Stack Software Intern

Noida, Uttar Pradesh

- Developed key backend features using Spring Boot and built dynamic, responsive frontend with React to create a seamless user experience.
- Worked on debugging, testing, and optimizing backend services in a production environment, collaborating with cross-functional teams.
- Designed and implemented a secure login module with authentication and role-based access, performing debugging, troubleshooting, unit testing, and code optimization to ensure reliability and high performance.
- Actively contributed to a global team by performing quality assurance and collaborative testing for the Romania-based PWF360 project, ensuring high-quality software delivery and performance.

Projects

Empowerly – HR/Employee Management System | *Spring Boot, React.js* |  *Empowerly*

Jan 2025 – Feb 2025

- Engineered an enterprise HR platform supporting attendance tracking, leave management, payroll automation, performance reviews, and employee collaboration tools.
- Designed a 6-layer security architecture featuring stateless JWT, RBAC, and active session monitoring.
- Built real-time chat and video meeting functionality using WebSocket and WebRTC, enabling live employee communication and collaboration.
- Integrated AI-powered chatbot and skill recommendations to automate HR queries and provide career insights.

ArriBot – An AI-Powered Learning Platform | *Spring Boot, React.js* |  *ArriBot*

Oct 2024 – Dec 2024

- Built an AI learning platform integrating chat, quizzes, flashcards, summarization, and resume analysis into a unified learning experience.
- Implemented AI usage tracking and rate limiting to control API costs and prevent feature abuse.
- Designed scalable REST APIs with JWT authentication and MongoDB persistence.
- Designed containerized deployment using Docker, Vercel, and Render, enabling seamless CI/CD-ready deployment.

ASTraMind – AI-Powered Codebase Intelligence Platform | *FastAPI, React* |  *ASTraMind*

Sept 2025 – Oct 2025

- Built a full stack AI platform indexing any GitHub repository into a queryable vector knowledge base using AST parsing, sentence-transformers, and ChromaDB, enabling natural language queries in under 60 seconds.
- Designed 15 AI agents covering security auditing, code review, debug, architecture, and test generation using Groq.
- Architected a RAG pipeline with language-aware chunking by logical functions and classes rather than fixed token windows, significantly improving retrieval accuracy and reducing hallucinations in LLM responses.
- Integrated GitHub REST API for real-time repository access, commits, and role-aware onboarding for engineers.

Activities

Health Hackathon, Johns Hopkins University, USA

- Developed a web application focused on stress recovery and emotional wellness during a competitive hackathon.
- Mentored peers in backend development fundamentals and participated in collaborative architectural discussions.
